HR

**Animoca Brands Limited**  
China

I am writing to express my interest in **Game Developer(Remote)** Position available at Animoca Brands Limited. I am a highly disciplined individual with a strong desire to create and develop games. Having an experience of **8 years** in Game Development I have gained valuable experience and knowledge by working at multiple US based tech companies. Being a **Gamer** myself, I understand the excitement a feature brings to a player. I am excited about the opportunity available at the company to apply my skills and knowledge to a professional setting and to contribute towards the already success of the **Animoca Brands**.

Throughout my career, I have created and used a strong base in Development and Coding Skills, including proficiency in **C#, Unity** along with a strong sense of leadership to guide my peers and share valuable knowledge with them. My knowhow also included languages like **JAVA** and **C/C++**. My formal education is a Master's Degree in Computer Applications

Although I don't have much experience with Smart Contracts I am sure I can learn that very quickly and implement the necessary systems into the product

I am very detail oriented and like to have a broader understanding of the whole project and how every cog fits within the framework. At my previous companies, I:

- Designed and Implemented Core Engine for Casino using **MVC** architecture topping up with Event Notification System along with Dependency Injection patterns solving **complex Design and Architectural Problems**
- Created **custom build delivery system** ensuring builds get deployed to their respective platforms and to correct URL's separating dev, test and production systems
- Integration of **REST API's** managing all aspects of success and failure responses
- Managed and mentor a team of developers depicting **Technical Leadership**
- Providing builds for testing as well as production as asked by the client showing punctuality and **deadline driven work**

I am confident that my experience, skills and desire to solve problems and involve deeply professionally would make me a valuable asset to your team.

Thank you for considering my application

Sincerely,

Balpreet Singh
