iOS, Android, Web, PC

URP
Intermediate

Dear Hiring Manager:

I am excited to be applying for the **Senior Game Developer** position at **DNS Gaming.**. I excel at the Technical Aspects of Development and have excellent document to code convertion skill. I love seeing projects go to completion as smoothly as possible and would like to have the opportunity to do the same.

After working with multiple companies based out of USA and India, I used my technical and leadership skills to oversee and manage development side of the projects.

With every project that i worked on:

· Used Design Patterns to create robust and extensible Codebase and solve complex Architectural Problems
· Built UI from ground up
· Shipped titles on Google Play Store, Apple App Store.
· Created Engine Systems for junior devs to work upon so that they can implement modules quickly and efficiently
· Learned new tools and solutions as the problems presented themselves to stay on top of Project Requirements

I am eager to Join DNS Gaming and start contributing to Game Projects. I want to be part of a team that provides great User Experience while keeping the spirit of gaming alive.

Looking forward to hearing from you

Thanks,
Balpreet Singh
